Lowndes

Personal Injury & Wrongful Death

Our trial attorneys have extensive courtroom experience in representing plaintiffs who bring personal injury and wrongful death claims. We have routinely represented individuals who were injured in automobile accidents and have aggressively litigated claims relating to personal injury, product liability, premises liability and other tort claims.

Our litigators have also represented manufacturers, distributors, property owners, developers, contractors and pharmaceutical companies in the defense of construction site accidents, automobile accidents, product liability claims, premises liability and pharmaceutical and medical device claims.

Several of the firm's attorneys have engineering or other technical degrees and years of business experience prior to engaging in the practice of law.

Additionally, the firm is a member of Meritas, an international association of law firms which facilitates the dissemination and exchange of information including the identification of leading experts in a particular or unique field to best represent our client's interests.
