

Technology

With our experience in the technology industry, we are able to advise clients from an insider's perspective on the wide-ranging and complex issues affecting their businesses.

Getting a product to market in today's world typically involves contractual relationships with other entities. Whether hardware development, supply chain, manufacturing, software development, telecommunications, medical devices, or e-commerce based business, we provide counsel for startup, product to market, exploitation issues, exit strategy planning and monetization transaction.

We assist clients with:

- Non-disclosure agreements
- Development agreements
- Independent contractor arrangements
- Intellectual property protection
- Manufacturing and invention agreements
- Licensing
- Marketing and sales relationships
- Other agreements related to commercialization

In addition to our experienced technology counsel, we use a team approach crossing multiple disciplines – including attorneys focusing on corporate, intellectual property, taxation, and employment issues – to manage the complexity of technology-related transactions and businesses.

We also assist clients in negotiation, mediation, arbitration and, when necessary, litigation of technology-related disputes.

Client Representations

- Software development and licensing
- Computer system hardware sales, acquisitions and support
- Medical device development agreements
