

Lowndes Advises Airon on Ventilator Licensing Agreement with GE Healthcare and Ford

Press Release

Lowndes

04.06.2020

Orlando, FL – Lowndes, a Florida-based law firm, advised Airon Corporation, a privately held Florida-based company specializing in high-tech pneumatic life support products, on an agreement to license its ventilator design to GE Healthcare, which will be manufactured by Ford Motor Company.

To help meet the critical need resulting from the COVID-19 pandemic, the agreement provides for the design of Airon's pNeuton Model A ventilator, which does not require electricity or batteries, to be licensed to GE Healthcare, with Ford providing the manufacturing capabilities to produce 50,000 ventilators in the next 100 days.

"We're proud to help facilitate these three companies coming together for this collaborative effort on such a short timeline. This agreement will deliver much-needed life-saving ventilators to thousands of COVID-19 patients in need," said Lowndes Shareholder Jim O'Brien.
